

Is your lab research dead in the water?

“*Pure Process Technology is ready when you need us.*”

Our expert technicians will promptly assess any issues and restore your system to peak performance, and efficiency; delivering a consistent flow of ultrapure water.”

Problem Solved.

If your water purification system is not functioning properly your research is at risk, along with your project schedules, deadlines, budget and lab reputation.

Our responsive services go beyond answering your call

The WPS experts at PPT will quickly determine the issues and respond immediately with timely on-site solutions. We don't just answer the phone and set up an appointment 'sometime in the vague future' - we promise a dedicated service technician, onsite within 24 hours, seven days a week.

To help you safeguard all components on your system, and sustain the flow of high quality water you require, we recommend a maintenance contract that includes the upkeep of essential elements such as:

- Filter change outs
- RO membrane replacement
- Storage tank sanitization
- Spray ball cleaning
- Replacement of system consumables:
 - UV lamp
 - Mixed Bed DI tanks

PPT is committed to resolving your problems when they occur and helping you avoid future emergency calls.

Our focus is ensuring your water purification needs are met, so you can focus on your vital research.

Call PPT for quick, reliable service today!
